

## Academic Placement

Of 172 graduates employed in an academic setting, 144 (or 84%) are faculty and the remaining 28 are either post-doctoral fellows or another academic type, including ~10 secondary school teachers or administrators.

Of the 144 faculty members, 25 are tenured faculty, 82 are tenure-track faculty, and 37 are not tenure track. The 37 non-tenure track faculty include approximately 25 lecturers and visiting assistant professors, at least 4 mis-coded tenure-track faculty, 5 researchers/administrators, and 2 secondary school administrators.

The distribution of positions shifts over time across the graduating cohorts, with the tenured faculty clustered in the earliest cohorts.
